DEPARTMENT \_\_\_\_\_

On Tuesday, January 21, 1986, at 10:55 p.m. Gene and I received a call on the radio from Joyce. She said the Fire Department Dispatcher had called her about a kerosene spill at 3233 E. Sunshine and that the fire department would be out there. We met a fire truck at the Amoco station at 3233 East Sunshine. A. Y. Doran of the fire department said that a customer dumped the 15 gallons of kerosene on the lot after mistakenly putting it into his diesel powered car. Scot McCoy, an employee at the station, said he would put oil dry on the spill.

DEPARTMENT

Re: Gasoline spill at 3233 East Sunshine (Apco Station)

At approximately 7:00 P.M. the Fire Department contacted me in regard to a gasoline spill at 3233 East Sunshine, an Apco Station. Upon investigation it was found that approximately 100 gallons of no-lead gasoline was lost when an underground tank overfilled. The spill occurred at 5:30 P.M. The gasoline ran East on Sunshine Street and entered the storm sewer. The Fire Department put enough water behind the gasoline to push it out of the storm sewer into a dry drainage ditch and allowed to evaporate.

Mr. Ben Smith, Vice President of Morris Oil Company, contacted me this morning and stated that after checking his records and sticking the storage tank he estimated the spillage to be at a maximum of 25 gallons. Also, he stated that the driver tried to wash it down with a garden hose after he realized that he had overfilled the tank. Mr. Smith was going to report the spill to the proper authorities.
